TRUE ALIGN

ADVANCED ENGINEERING

TRUE ALIGN Clear Aligners are made from a premium thermoformed plastic material that is engineered for **precise fit, ongoing force retention, and exceptional durability.**

- **PREMIUM MATERIAL** - continual force for faster treatment and greater comfort for your patient.
- **IMPROVED STAIN RESISTANCE** - starts clear, stays clear.

TRUE ALIGN Aligners use an elastomeric layer encased in a dual shell construction that provides a consistent, continual force for your patient's comfort.

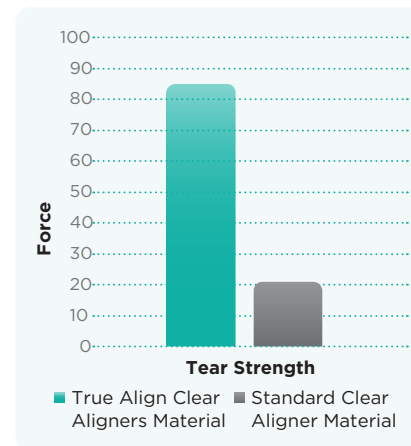

Dual Shells

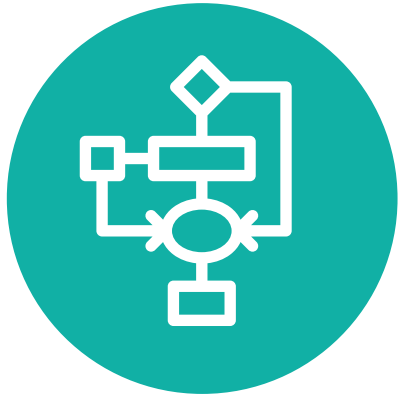

The consistent pressure produced by the dualshell construction accurately moves teeth over the prescribed period of time.

TEAR STRENGTH & STAIN RESISTANCE

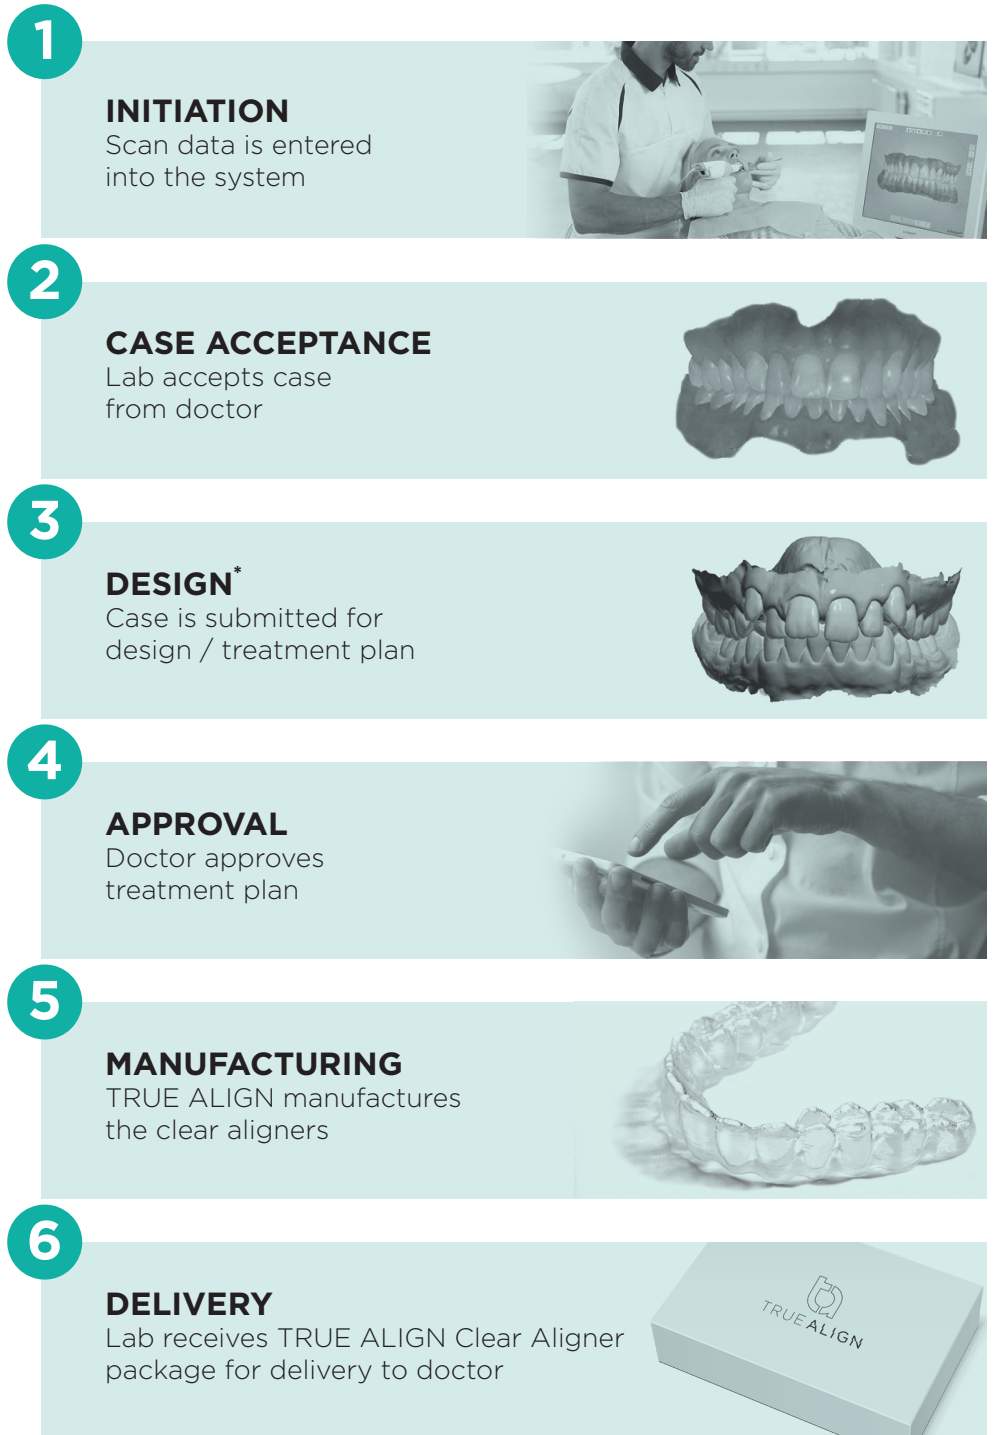

This material has superior ability to resist tearing and staining after an extended period in the oral cavity.

SIMPLE AND STREAMLINED CASE MANAGEMENT

- EASY TO ORDER
- EASY TO TRACK
- TREATMENT REVIEW AND CASE MODIFICATION PROCESS
- SUPPORT AT EVERY STAGE
- FAST TURN-AROUND TIME

*Design is provided by an independant design center.

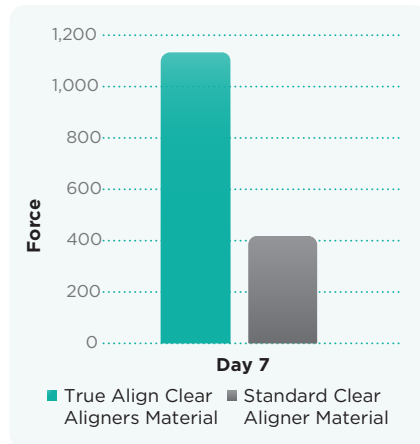

TREATMENT OPTIONS

On-going force retention provides greater tooth movement over time.

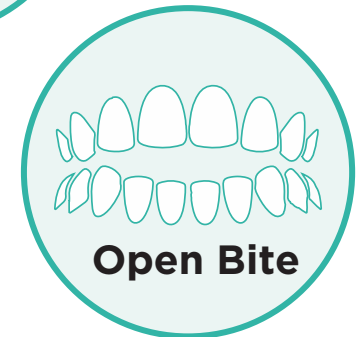

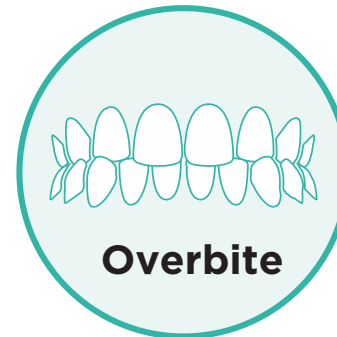

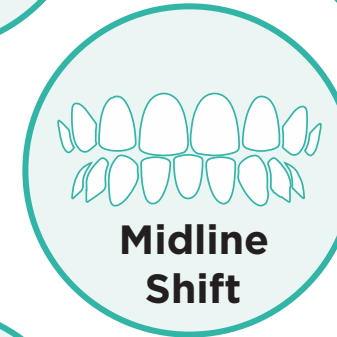

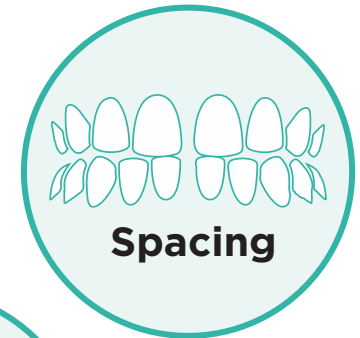

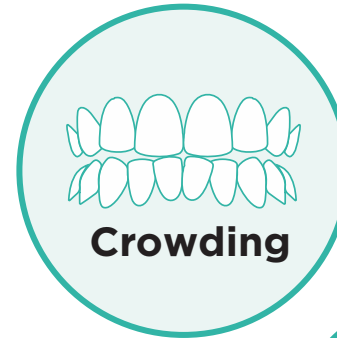

TOOTH MOVEMENT FORCE AT 98.6°F

Initial vs. Day 7

PERFECT FOR ESTHETIC CASES

- ANTERIOR AND PREMOLAR MOVEMENTS
- NO MOLAR MOVEMENTS OR BAND TREATMENT

EDUCATION **YOUR WAY**

Webinars and online videos mean you can train at a time that's convenient to you.
