WHY TRUE ALIGN CLEAR ALIGNERS?

Now you can have the smile you've always wanted at a price you feel good about.

True Align Clear Aligners are a comfortable, affordable, and effective way to straighten your teeth. Our clear aligners are made from FDA cleared, premium material, and are expertly manufactured in San Diego, California.

Treatment plans are customised to your unique smile, so you get the results you want in as short a time as possible.

HOW LONG IS THE TREATMENT?

Treatment times are different for everyone, but generally last less than one year. Your dentist will work with you to determine a timeline for your specific smile, and will decide if you should change your True Align Clear Aligners every week or every two weeks.

WHO ARE TRUE ALIGN?

True Align is a patient focused clear aligner developed by HQ dental - an industry leading laboratory & clinical facility. Advanced engineering, improved stain resistance & increased durability makes True Align a more comfortable way to transform your smile.
